DIM-30DE-1 ICE DISPENSER

Product Description

The DIM-30DE-1 produces cubed ice and has a new exterior design. The freshly produced ice does not come in contact with light or air when stored and therefore maintains the highest quality. Its ice is very well suited for multiple environments including food and beverage, leisure and healthcare.

- Portion control can be easily set, making it easy to regulate the consumption of ice among end-users, reducing energy consumption and waste.
- Hoshizaki ice dispensers are more compact with reduced space requirements and in line with modern interiors.
- Due to the auger system the water consumption is equal to the ice production.

Ice Type: Cube
Size: 28 x 28 x 32 mm
